<p>I had a wonderful time in this Summer School. I feel that the creators of the program put in a great deal of effort in making this program just as enjoyable as the real thing. The quality of both the lectures and social events was outstanding. The best part of the lectures was being able to learn about science and technology from the basics to advanced level. Learning about cutting edge technology was a truly valuable experience for me.</p> <p>One thing I regret is not participating in this Summer School sooner, because the sooner you study abroad, the more motivated you will be towards your studies in the following years. Since taking this course, I love Germany even more than before! I hope I can visit Aachen someday and re-experience everything first hand.</p>	Miki	Japan
<p>This two weeks became an unforgettable time for me. During this time, I learned a lot from all of the mentors in Aachen University, and students in Keio University. And I was able to experience the German cultures and architectures through the virtual tour. It was unfortunate that we couldn't go to Aachen, but it was really fun and high quality! If I can get the opportunity, I'd like to visit Aachen University.</p>	Koshiro	Japan
<p>This online course was wonderful. I could make the best of online classes and realized deep learning. This was the first time to take foreign classes and there was some worry about my language skills, but all teachers and mentors are very kind enough to take part in. Besides, I was able to learn the cutting-edge technology. I was fairly satisfied with experience in this Summer School in Aachen.</p>	Kenji	Japan
<p>As a Japanese student learning mechanical engineering, this summer program offered me an incredible opportunity for me to gain knowledge about how mechanical engineering is developed in other countries. Through this course I was able to learn the importance of studying the basics, and building further knowledge upon the basics. It also taught me that I should be interested not only in robotics, but in other fields like chemistry and biology. Learning abroad is my goal in the future, and I was able to get a sense of what it is like to learn in English. This course gave me motivation to keep going, and I would recommend this program to anybody and everybody who wishes to take a challenge over the summer.</p>	N.A.	Japan

<p>I learned a lot in two weeks. Even though it was online, I had wonderful time for me to attend live lectures and experiments. I was able to learn enough and experience German culture without actually being able to go there due to COVID-19. It was my first time to participate in a summer school, but all the professors, mentors, and staff were very kind which made me feel at ease. I am looking forward to visit Germany, Aachen some day.</p>	Yoshihide	Japan
<p>In the German Engineering and Culture Online Course at RWTH Aachen University, we took lectures of science, talked with mentors mainly about ourselves and our culture and went sightseeing online.</p> <p>I think if you are interested in biology or chemistry, this course is especially worth taking.</p> <p>We had several social events, and I had a lot of fun communicating with others. We could also get a lot of information about going abroad, so if you have never been abroad and are interested in studying abroad, this course is a good choice.</p>	Shu	Japan
<p>Satoshi Kusakabe, Japan, majoring mechanical engineering</p> <p>A super-wonderful experience amid the pandemic! The lectures covered a broad overview of science and the application of it to the engineering field. Moreover, the program included such activities as a virtual biological experiment, which were incredibly interesting. It was also a nice opportunity to talk with mentors at RWTH since I was able to see that RWTH welcomes many nationalities and to successfully broaden my connection amid the pandemic.</p>	Satoshi	Japan
<p>The Summer School (online) provided me opportunities to socialize with RWTH-Aachen's students and the unique study experiences about European countries. I could learn about the culture, broaden my perspective and improve my English skill in scientific, industry fields, participate in various English lectures related to science and engineering. And the knowledge I obtained from this program gave me inspiration. I'm looking forward to visiting Aachen actually in the future!</p>	Yoko	Japan
<p>It was a wonderful experience that I participated in the Summer School at RWTH Aachen University. Though it was an online course, I could learn a lot about what it is like to spend the campus life in Aachen and experience many attractive lectures and experiments of the University. Moreover, I realized that Aachen city has a long history and plenty of places of interest such as Aachener Dom. This program provoked my ambition to study abroad! I am looking forward to visit Aachen and meet the professors, assistants and students again!</p>	Raitaro	Japan

<p>It was a great experience to participate in the online course (due to COVID-19) of German Engineering and Culture in Summer School at RWTH Aachen University. I learned a lot of interesting things in the lecture. The experiment in the lecture of Bioprocess Technology was especially interesting. I also appreciate the opportunities to interact with the lecturers through the Q&A sessions. On the other hand, I had a very good time at the social events. We enjoyed the digital city tour of Aachen and meeting up with mentors. We introduced our language, culture, sightseeing spots and so on to each other.</p>	Kyotaro	Japan
<p>The two weeks of Aachen Summer School were awesome. I was taught science in a wide range of fields by teachers who were respectable and attractive. I was able to learn not only science but also German culture. Also, I interacted with students at Aachen University.</p> <p>The Aachen Summer School program has become very valuable to me. From now on, when studying my specialty at university.</p> <p>Because I couldn't go to Aachen this time, I wanna visit there someday.</p>	Kanata	Japan
<p>Although the entire program was carried out online, I really enjoyed all the lectures and the social events. It was my first time participating in such an international program and I think this experience broadened my perspective.</p> <p>I had a great time talking with the mentors and I got to know many things about Germany.</p> <p>I would like to visit Aachen some day.</p>	Taiki	Japan
<p>Attending a digital summer school was for sure the most memorable experience I've ever had. Having the opportunity to learn from the best teachers in the world, learn about different cultures and learn to play the scaped room was incredible.</p> <p>I will definitely not forget this summer school and I am looking forward to meeting Aachen in person.</p>	Peterson	Brazil
<p>Hello, everyone! I am Aulia sarah, an engineering physics student from Indonesia. The three weeks I spent learning with RWTH Aachen University Summer School was truly an experience. During the course, I learned a lot about automation, IT, data science, AI, materials science, and so much more from reputable lecturers and people from the industry. Even when it was conducted online, we still manage to do group projects, visit laboratories, and see real-life applications. The lecturers were always encouraging us through discussion and the RWTH International Academy team was very</p>	Aulia	Indonesia

<p>helpful, everyone was really warm and welcoming! All in all, I definitely recommend the course to anyone interested in the production industry :)</p>		
<p>It is my great honor to attend this Summer Course organized by RWTH Aachen University. The class was so active that I liked it. The teachers always encouraged us to ask questions and were happy to answer them. Thanks to all the teachers for their hard work! I like Germany very much and prefer to study there one day.</p>	Mingrui	China
<p>It has been a pleasure and a great experience being in this Summer School. I felt that I have improved a lot by learning with the classes and lectures that we had. The professors were all kind and inspiring, making us feel comfortable asking questions and making comments. I also found it eye opening, because I didn't expect all the opportunities they showed us, that one day we could have in our future. Mauricio Rivera – Perú</p>	Mauricio Rivera	Peru
<p>I've harvested a lot from the 3-week summer school program provided by RWTH Aachen University, not only rich knowledge about robots, but also local customs and culture related to Germany. The teachers and mentors made great efforts to make online courses abundant and interesting, including expert talk, social events, live demonstration of operating robot arms and so on. Theory and practice have been well combined.</p>	Chunzhi	China
<p>Time flies, the three weeks online course was just over. For me it's a very amazing experience. I learned a lot about the robotics from this course. And I also learn a lot of funny cultures from different countries. All the teachers are kind and patient, they teach me a lot when I have questions. Also, the activities are interesting and funny. I will never forget the great experience in Aachen.</p>	Junyou	China

<p>Hi, I'm Aman from India. I had enrolled for the course, 'Robotics for Future Industrial Application'. The Summer School was full of practical as well as theoretical concepts taught by acknowledged professors and assistants. This course not only strengthened my fundamentals of robotics, but also introduced me to learning in an inter-cultural environment. The fun part about the course were the social activities where we got to interact and form lasting bonds with our fellow classmates!</p>	Aman	India
<p>I learned for three weeks at Aachen Summer school. I learned a lot of useful knowledge about robots in Aachen Summer school. I was also exposed to a lot of German culture. And added some knowledge of German traditions and customs. I'm looking forward to visit Aachen in the future.</p>	Gaonan	China
<p>It was an excellent experience to attend this Summer School. The distance learning modality was really useful to participate in all of the lectures and to know a little more of the German culture and other cultures around the world through the intercultural activities. I learnt a lot of things related with robots, programming, trajectory planning, and cannot wait to apply them in my future projects. I hope to visit Aachen in the future.</p>	Pedro Luis	Peru
<p>I am Mingbo Liu from China, a junior student majored in Mechatronic Engineering. I've learned a lot from the Digital Winter School. I took the winter school to learn something about the Industrial 4.0 at first, but I got much more than what I expected before. The two teachers of the winter school are both kind and knowledgeable, they've taught me a lot during the winter school, and helped me when I got trouble with the lecture. Except the lectures, the winter school also help me becoming aware of German Culture. I am really appreciate of the teachers, and wish to study in Aachen in future.</p>	Mingbo	China
<p>The artificial intelligence courses in RWTH Aachen University in recent weeks have benefited me a lot. The teacher's explanation is very responsible and detailed. I hope I can better apply these knowledge in my future study and life, and welcome more students to join the course.</p>	Xiaozhe	China

<p>Being in RWTH Digital Winter School was such a pleasing experience. The courses are inspiring and meaningful, with responsible teachers and carefully planned schedule. Assistants are enthusiastic and always willing to help. They provided social events which made me more familiar with not only my classmates, but also Aachen and RWTH. This is an unforgettable journey.</p>	Jiyiing	China
<p>My name is Xuanming Shi and I'm from China. It's the first time for me to take part in the Winter School at RWTH Aachen. I think it is a great honor for me to be one part of this course. I not only learned professional knowledge, but also about Germany and German culture, as well as RWTH Aachen. Although it's a pity that I can't go to Aachen to study because of the epidemic situation, I hope I can have the opportunity to study for my master's degree in RWTH Aachen in the future.</p>	Xuanming	China
